Rebuilding Together San Francisco
30th Anniversary
Partnership Opportunities
Repairing Homes and Revitalizing Communities

Rebuilding Together San Francisco revitalizes neighborhoods by providing critical home repairs to income-qualified neighbors and renovating community centers and public schools free of charge.

Why Our Work is Critical

We preserve affordable housing for hundreds of seniors and families in San Francisco, enabling them to remain in their communities, where people and resources are familiar.

Maintaining and preserving existing housing also allows homeowners to pass homes on to their children and grandchildren, providing generations of family members with safe and affordable housing.

Our Community Impact

Since 1989, Rebuilding Together San Francisco has partnered with San Francisco businesses, builders, community organizations, and thousands of volunteers to repair 3000 homes and 350 community facilities in the city.

Our partner sponsors have donated $4.5 million including cash, materials, supplies and professional expertise.

Who we serve

For 29 years, Rebuilding Together San Francisco has been the only provider of free home repairs to those physically or financially unable to pay for such repairs.

- 32 years—average number of years living in their homes
- 71 y.o.—average age of homeowner
- $21,000—average household income
Our Programs

National Rebuilding Day

Rebuilding Day is a citywide renovation project that engages volunteers of all levels in repair projects across the City of San Francisco.

• Corporate and community teams join skilled building trades professionals, leveraging financial contributions to create $4/worth of repairs for each $1 donated.

Safe at Home

Safe at Home is a year-round program focused on home modifications that reduce health and safety risks in the home.

• Volunteer installers and vetted contractors repair 200 homes annually, increasing the mobility and independence of seniors and people with limited mobility.
**SHEBUILDSD**

Women helping women create safe and healthy homes and community facilities.

SHEBUILDSD projects are entirely women staff by contractors, electricians, carpenters, landscapers, and painters. Our projects focus on households headed by women and nonprofits that serve women.

**Rebuild My Block**

A micro-neighborhood improvement day involving home repairs, nonprofit renovations, small business improvements and sidewalk clean-ups.

Rebuild My Block engages community members in identifying a 1-3 block area where they want to create a safer and more resilient neighborhood.
Partnership Opportunities

Rebuilding Together partners with San Francisco’s leading corporations, small businesses, and community organizations to improve the lives of our neighbors. As a Rebuilding Day Partner, you can create a team-building experience with a group of employees and family members working together on a home or community space.

“\[quote\]
I enjoy the feeling I get on the day of the project - how we get to see the reactions of the homeowners. I enjoy the shared feeling with other volunteers/teambuilding. I like the feeling I get through fundraising, talking about it to people, and being recognized for doing this work.\[quote\]"

Benefits of Partnership

❖ When your employees participate in a unique team building experience, they directly improve the health and safety of homes and community facilities.

❖ You’ll help preserve affordable housing for hundreds of seniors and families in San Francisco.

❖ Our workshops teach basic painting and repair skills to get your team ready for their project.

❖ Being out in the City’s neighborhoods - making a difference - increases brand awareness of your company’s contributions to the community.

How YOU Can Help
Bring a team of volunteers to:

**REPAIR** a home with years of deferred maintenance, creating a safe and healthy home for the future.

**REVITALIZE** an empty schoolyard into dynamic educational garden for students.

**REBUILD** a block of 40 individual homes into a community of neighbors who look out for each other.
